

Most Americans Say: Teen Pregnancy Prevention is Not Enough

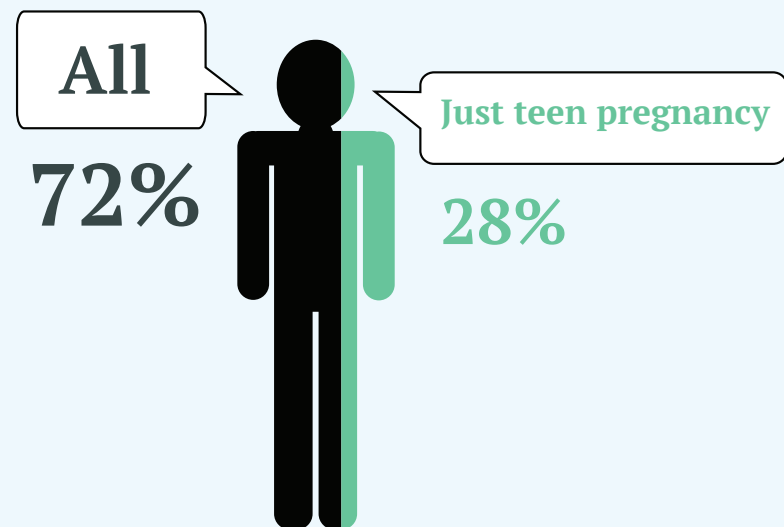

Youth Deserve All the Skills to Help Them Thrive

What the people want

Should high school students **Avoid all the Consequences** of sex or just teen pregnancy?

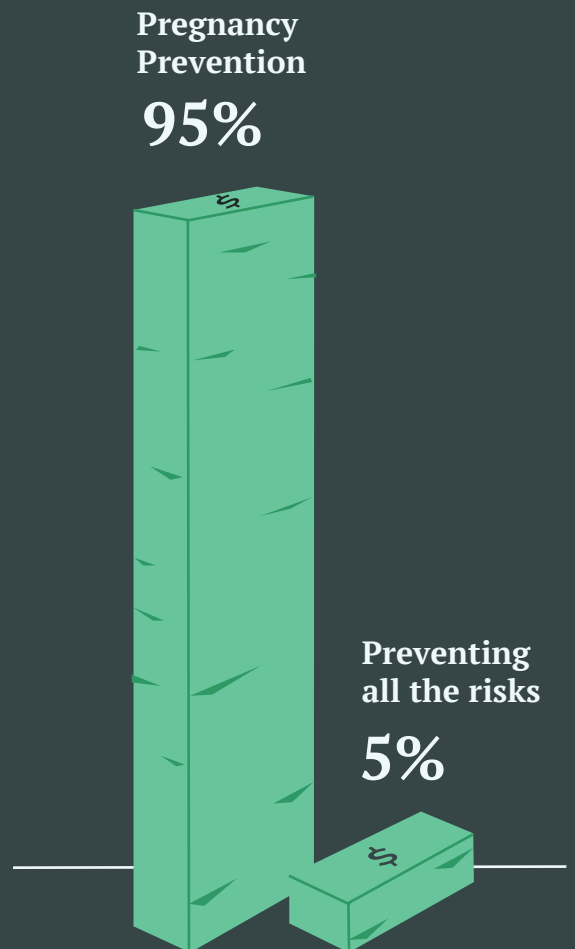

Should middle school students **Avoid all the Consequences** of sex or just teen pregnancy?

Current federal policy is short-sighted

Current policy gives 95% of sex education **Funding** to programs that only focus on teen pregnancy prevention rather than on **All** the possible risks of teen sex.

A Broader Vision = Healthier Teens

(Formerly the National Abstinence Education Association)
